

## Webinar on 'Towards Green Transition' Facility

**Monday 22 February 2021, 13:30 – 15:00 CET**

The 'Towards Green Transition' Facility is a new initiative by the European Cluster Collaboration Platform (ECCP) to enable clusters registered at the ECCP to promote green transition skills amongst their members through technical advisory support by highly qualified advisors.

In this Facility, selected clusters will be trained and advised on a range of green transition topics so they can support their cluster members (especially SMEs) to become more resource efficient. Services will be tailor-made and focused on the specific needs and challenges of each selected cluster.

This webinar will present the main features of this Facility and address questions from interested participants on the application process and services offered.

### Agenda

13:20-13:30	<b>Dial in of participants</b>
13:30-13:35	<b>Welcome to participants</b> Andreas Pauer, ECCP
